Velocita Technology, Inc. is proud to present to you our "Technology Interactive Monthly" newsletter. We hope that you will find the information contained within to be useful and informative. We will provide you

with the latest hardware and software innovations that the computer industry has to offer, as well as information on business technology that you will be able to use. If you have any ideas for future articles please contact us at help@velocitatechnology.com or by calling (815)744-9595.

Tech Tips for the Basic Computer User

I wanted to thank everyone for all of the kind remarks that were said regarding our first newsletter. We will continue to bring you the latest tech tips, tricks and technology news. Just look at some of these great tips. They will surely increase your production in the workplace as well as at home:

- When you get an e-mail message from eBay or your bank, claiming that you have an account problem or a question from a buyer, it's probably a "phishing scam" intended to trick you into typing your password. Don't click the link in the message. If in doubt, go into your browser and manually type "www.ebay.com" (or whatever).
- Nobody, but nobody, is going to give you half of \$80 million to help them liberate the funds of a deceased millionaire...from Nigeria or anywhere else.
- Oh, yeah: on the computer, * means "times or multiply" and / means "divided by."
- Google is also a units-of-measurement and currency converter. Type "teaspoons in 1.3 gallons," for example, or "euros in 17 dollars." Click Search to see the answer.

Velocita Technology is an Advanced Xerox Partner

Windows 7 Revealed!

Microsoft boss Bill Gates and CEO Steve Ballmer have revealed a select few features from the next Microsoft operating system - Windows 7.

Shown at the "All Things Digital" event, primarily featured was multi-touch technology that is reported as being similar to that of the iPhone and Microsoft's "coffee table" computer, the Surface.

Improved "Day One Experience." Microsoft wants Windows 7 to be useable and exciting "out of the box," and it's improving the experiencing of running this new OS for the first time. This will include an even more streamlined Setup routine and a thoroughly overhauled user interface. An OS X-like dock, multi-touch gestures in photo galleries like two-finger zoom, flicking, and panning are included.

Obviously it's all very much at early demo stages yet and will no doubt be tweaked and reworked before the final version of Windows 7 is available. Industry experts are estimating early ship dates of Windows 7 to some manufacturers will possibly be as soon as July 2009. It will not be available to the mainstream consumer until the end of 2009. If you are interested in getting a sneak peek of Windows 7, stop by the Velocita showroom at 50 Barney Drive and check it out ... we have it available for demonstration today!

Tech
Tips
&
Tricks

• Whatever technology you buy today will be obsolete soon, but you can avoid heartache by learning the cycles. New iPods come out every September. New digital cameras come out in February and October.

• You generally can't send someone more than a couple of full-size digital photos as an e-mail attachment; those files are too big, and they'll bounce back to you. (Instead, use iPhoto or Picasa—photo-organizing programs that can automatically scale down photos in the process of e-mailing them.) Download Picasa at <http://www.google.com/picasa/>

• You can open the Start menu by tapping the key with the Windows logo on it.

• You can switch from one program to the next by pressing Alt+Tab.

Video Security in our Airports

To avoid shutdowns and protect visitors and employees against terrorism and crime, airports around the globe have selected Verint video surveillance solutions. Verint's Nextiva wireless and wireline encoders, decoders, and IP cameras capture images from virtually any location. Nextiva's advanced analytics rapidly detect significant events in the vast amounts of video you capture, freeing security staff from hours of tedious review. And Nextiva's robust video management software, intelligent video distribution, and system-wide monitoring and diagnostics simplify video management in dynamic airport environments. 9 out of every 10 major airports in the United States, including Chicago's Midway and O'Hare airport use Verint video surveillance solutions. The FAA each year spends millions of dollars on research and development, and they have selected Verint as their premier video surveillance partner. Using Nextiva, you can manage your entire video operation from a central, local, or remote location and view images from virtually anywhere.

Velocita Technology, Inc. is proud to have earned the Solution Gold Partner dealer status (only 38 other dealers in the U.S. have earned this high honor) with the largest digital IP based camera manufacturer, the Cadillac in the digital camera industry, Axis Communications. Velocita Technology, Inc. has also partnered with the digital video software manufacturer Verint who manufactures the award winning video recording and review system, Nextiva. Walmart, Home Depot and many more of the worlds largest corporations have chosen to use Verint for their video surveillance needs. Velocita Technology, Inc. provides the ultimate solution by combining the best surveillance software with the highest quality cameras currently available. By partnering with the best, Velocita Technology, Inc. can provide you the best of the best. Call your Velocita Technology account manager today to setup your video surveillance demonstration.

How Important is a Clean Computer?

Does the back of your computer look like this? Do you know how the inside of your computer looks ... is dust building up? Air movement is key to a computers life span and dust can build up very fast. Fans cycle air through the case to prevent heat buildup extending the life of your components. By not properly maintaining your computer you could be shortening the life of your tower and increasing the risk of losing important data. Velocita support technicians can clean out that dirty computer for you. With a thorough cleaning you can be rest assured your computer is in tip top shape. Call 815-744-9595 to set up your appointment to get a complete examination including a 30 point preventive maintenance check and Free computer cleaning!

A Dirty Computer Can:

- Cause your computer to overheat.
- Make vital components fail.
- Shorten component life span.
- Cause fans to fail creating even more issues.
- Potentially start a fire.
